SECURITY REPORT

1
/10
LOW

SCAN TARGET

200.79.185.134

Open ports detected: **1** · Public IP: **200.79.185.134**

A risk score of 1/10 (LOW) indicates your business has security issues that need attention. The higher the score, the greater the chance of a breach, ransomware, or data theft.

EXECUTIVE SUMMARY

The security scan of 200.79.185.134 found 3 medium and low severity issues. No critical vulnerabilities were detected, but 1 issues should be addressed this week to harden your security posture. Detailed fix instructions are included for each finding.

✓ No high-risk open ports were detected from the internet — your firewall appears to be blocking dangerous services.

TOP RECOMMENDATIONS

1 No HTTPS / SSL Not Available: Install an SSL certificate to enable HTTPS.

DETAILED FINDINGS

No HTTPS / SSL Not Available

Port 443 · HTTPS

MEDIUM

WHAT IT IS	No HTTPS detected on port 443 — web traffic is sent in plain text, visible to anyone on the network
BUSINESS RISK	Customer passwords, contact details, and any form submissions can be read by anyone on the same network (public wifi, ISPs, etc.), and modern browsers will actively warn visitors that your site is 'Not Secure' — which drives people away and can hurt your search rankings.
REAL-WORLD EXAMPLE	Example: A visitor fills out a contact or login form on this site from a coffee-shop wifi network. Because the connection isn't encrypted, anyone else on that same network can read the form data — including a password — as it's sent.
HOW TO FIX	Install an SSL certificate to enable HTTPS. If you use a web host (GoDaddy, Bluehost, Cloudflare, etc.), go to their control panel and enable 'Free SSL' or 'Let's Encrypt'. If you manage your own server, run: sudo certbot --nginx (or --apache) and follow the prompts. It's free.
URGENCY	**Fix within 1 week**
REFERENCE	CWE-319 — Cleartext Transmission of Sensitive Information Sensitive data is sent over the network unencrypted, so anyone monitoring the connection can read it.

No Abuse Reports Found for Public IP

Port HTTPS · IP Reputation

INFO

WHAT IT IS	Public IP 200.79.185.134 (hosted by XTURBO PROVEDOR DE INTERNET LTDA - EPP) has no abuse reports on AbuseIPDB in the last 90 days.
BUSINESS RISK	A clean IP reputation is a good sign — no other indication needed here.
HOW TO FIX	No action required.
URGENCY	**Informational**

Hosting Network Identified

Port HTTPS · IP WHOIS / Network Ownership — INFO

WHAT IT IS	Public IP 200.79.185.134 is registered to XTURBO PROVEDOR DE INTERNET LTDA (BR) — network: 229994 — block: 200.79.184.0 – 200.79.191.255.
BUSINESS RISK	This is informational — it tells you (and anyone else who looks it up) which hosting provider or network actually operates this IP. Useful for confirming you're hosted where you expect, or for context if the IP reputation check above flags anything.
HOW TO FIX	No action required — this is identifying information, not a vulnerability.
URGENCY	Informational

PORT REFERENCE TABLE

PORT	SERVICE	RISK	DESCRIPTION
